

'India likely to be first to sign trade deal with Washington'

PTI, NEW YORK/ WASHINGTON: US Treasury Secretary Scott Bessent has said he expects India to strike the first bilateral trade deal to avoid President Donald Trump's reciprocal tariffs, according to the New York Post.

TARIFF BYPASS

A 26% 'reciprocal' tariff on Indian exports to the US is currently on a 90-day pause, set to expire on July 8. However, like other countries, India is presently sub-

ject to a 10% tariff under the existing policy. According to the New York Post, Bessent told a roundtable of about a dozen reporters on Wednesday that trade talks with India are "very close" to reaching a successful conclusion because the world's most populous nation doesn't have "so many high tariffs."

"India also has fewer non-tariff trade barriers, obviously, no currency manipulation, very, very little government subsidies, so that reaching a deal with the Indians is much easier" — Scott Bessent, US Treasury Secretary

obviously, no currency manipulation, very, very little government subsidies, so that reaching a deal with the Indians is much easier," Bessent said at the DC event on the sidelines of the annual World Bank and International Monetary Fund meetings. President Trump has demanded that other countries break down their tariffs and non-tariff barriers

US Treasury Secretary Scott Bessent speaks during the International Finance Institute Global Outlook Forum at the Willard InterContinental Washington on Wednesday, in Washington, DC

to American goods, as well as eliminate US trade deficits, the New York Post said. Earlier on Tuesday, US

Vice President JD Vance in Jaipur urged India to drop non-tariff barriers, give greater access to its markets and buy more American energy and military hardware as he laid out a broader roadmap of deeper ties between the two nations for a "prosperous and peaceful" 21st century.

The New York Post quoted data from Census Bureau to say that India accounted for nearly 3% of imported goods to the US as of February. The US had a \$45.7 billion trade deficit with India in 2024, according to the Office of the US Trade Representative.

BSE CEO cautions investors: 'Regulations alone can't save you if you don't protect yourself'

KOLKATA: Stressing the need for investor awareness and responsibility, BSE Managing Director and CEO Sundararaman Ramamurthy on Thursday said that regulations alone cannot protect investors if they do not take adequate precautions while investing. "You trade what you understand, and you understand what you trade — if you don't do that, you have a problem," Ramamurthy said, urging investors to be vigilant and informed. He criticised the tendency of investors to rely on hearsay rather than due diligence. "You scan a vegetable before you buy it, but when you invest your life's earnings, you go by hearsay — that's not how it should be," he said. On regulatory expectations, the BSE chief remarked that there is a general perception that regulators are blamed when investors lose money, but when markets do well the same person praise their own knowledge. "If you don't want to safeguard yourself, no amount of regulation can save you. Be alert," he stressed.

Global trade could slide this year: WTO

AP, GENEVA: The World Trade Organisation says the volume of trade in goods worldwide is likely to decrease by 0.2% this year due to US President Donald Trump's shifting tariff policies and a stand-off with China, but it would take a more severe hit if Trump carries through on his toughest "reciprocal" tariffs.

TRUMP'S TARIFFS

The decline in trade will be particularly steep in North America even without the stiffest tariffs, the global trade forum said Wednesday, with exports there this year expected to fall by 12.6% and imports by 9.6%. The WTO based its report on the tariff situation as of Monday. Initially, 2025 and 2026 were expected to have continued expansion of world trade, but Trump's trade war forced WTO economists to substantially downgrade their forecast, the forum said. Trade in goods worldwide would slump by 1.5% if Trump follows through on his stiffest tariffs on most nations, and Mexico about tariffs on their goods.

China denies talks with US to reach deal on tariffs

PTI, BEIJING: China on Thursday denied any talks with the US to reach a deal on tariffs, saying that there is "no factual basis" for any claims of progress in the bilateral talks.

"China and the US are not having consultation or negotiation on tariffs, still less reaching a deal," Chinese Foreign Ministry spokesperson Guo Jiakun told a media briefing here, reacting to reports that China and the US are having talks and are even about to reach a deal.

"This tariff war was launched by the US. China's position is consistent and clear. We will fight if it is a must. Our doors are open if the US wants to talk; dialogue and negotiation must be based on equality, respect, and mutual benefit," Guo said.

Separately, China's Commerce Ministry has also refuted reports about the US-China talks to reach a deal on tariffs, saying there is "no factual basis" for such reports.

Replying to questions at a media briefing, the ministry's spokesperson, He Yadong, said, "If the US truly wants to resolve the issue, it should heed rational voices from the international community and domestic stakeholders, completely abolish all unilateral tariffs on China, and find a solution through equal dialogue."

Safety assessment rating for heavy vehicles on lines of Bharat NCAP soon: Gadkari

PTI, NEW DELHI: The Ministry of Road Transport and Highways is planning to launch safety assessment rating for trucks and heavy commercial vehicles on the lines of Bharat NCAP (New Car Assessment Programme), the country's own crash testing programme, Union Minister Nitin Gadkari said on Thursday.

Addressing an event organised by the New Car Assessment Program (GNCAP) and the Institute of Road Traffic Education (IRTE), Gadkari said the idea is to encourage manufacturers to improve the production quality making vehicles more safe. The road transport and highways minister further said the government is already working on standards and safety assessment system for battery-operated e-rickshaws in the country as they suffer from safety issues.

The safety improvement in e-rickshaws will improve their quality and generate more employment, he added.

In 2023, Gadkari had launched the Bharat NCAP (New Car Assessment Programme), which is aimed at im-

proving at road safety standards of motors vehicles up to 3.5 tonnes. He said India accounts for the highest number of fatal road accidents with 4.8 lakh road crashes each year resulting in 1.8 lakh deaths.

The government's top priority is road safety, expansion of safe highways and vehicle safety and bolstering electric vehicles, Gadkari added. He said the government is also working on reducing logistics cost to 9% in the next couple of years from the present 14-16%.

Gadkari also said the road ministry is also working on a law to determine the working hours for truck drivers as they drive 13-14 hours a day at present.

Bengaluru firm unveils tech to recycle plastic that can't be melted

PTI, BENGALURU: In a breakthrough for plastic recycling and sustainable manufacturing, Bengaluru-based Steer World has unveiled the Omega Twin-Screw Extrusion Technology, which could help manufacturers recycle plastics that cannot be melted.

Steer World, headquartered in the Peenya Industrial Area of Bengaluru, specialises in materials transformation technologies.

Speaking to PTI, Prakash Hadimani, Global Head of the Application Development Centre at Steer World, said crosslinked polyethylene (XLPE)—such as the outer layer of cables that covers copper wire—has long been considered non-recyclable. Traditionally, major players sold

Crosslinked polyethylene (XLPE)—such as the outer layer of cables that covers copper wire—has long been considered non-recyclable. Traditionally, major players sold these wires in bulk as scrap. Buyers of the scrap would extract the copper and dispose of the shredded plastic, which ends up in landfills

— Prakash Hadimani, Global Head of the Application Development Centre at Steer World

these wires in bulk as scrap. Buyers of the scrap would extract the copper and dispose of the shredded plastic, which ends up in landfills," said Hadimani.

He explained that although it is technically possible to break down polymers in such plastic waste—also called thermoset waste—using chemicals, the process is intensive, expensive, and environmentally unfriendly. Even bulk producers preferred discarding the waste

rather than recycling it.

"The process involved chemicals and extensive use of water to neutralise them, making it neither viable nor eco-friendly," Hadimani added. With Steer World's new technology, he said, it is now possible to break the carbon linkages, softening the polymer into a meltable form.

"The Omega Twin-Screw Extrusion uses our patented Fractional Geometry Technology (FGT) to re-
