# 2 killed in Russian attacks on Ukraine as talks remain uncertain

AP, KYIV: Russian drone and missile attacks on Ukraine on Saturday killed at least two people, including a 9-year-old girl, officials said, as uncertainty remains about whether Kyiv diplomats will attend a new round of peace talks proposed by Moscow for early next week in Istanbul. Russian troops launched some 109 drones and five missiles across Ukraine overnight and into Saturday, the Ukrainian air force said. Three of the missiles

and 42 drones were destroyed and another 30 drones failed to reach their targets without causing damage, it said. The girl was killed in a strike on the front-line village of Dolynka in the Zaporizhzhia region, and a 16-year-old was injured, Zaporizhzhia's Gov Ivan Fedorov said. "One house was destroyed. The shockwave from the blast also damaged several other houses, cars, and outbuildings," Fe-

dorov wrote on Telegram. A man was killed by Russian shelling in Ukraine's Kherson region, Gov Oleksandr Prokudin wrote on Telegram. Moscow did not comment on either attack. Russia's Ministry of Defence said Saturday that it had gained control of the Ukrainian village of Novopil in the Donetsk region, and took the village of Vodolayh in the northern Sumy region. Ukrainian authorities in Sumy ordered mandatory

evacuations in 11 more settlements as Russian forces make steady gains in the area. The new additions bring the total number of settlements under evacuation orders in Sumy, which borders Russia's Kursk region, to 213. Ukrainian President Volodymyr Zelenskyy has said some 50,000 Russian troops have amassed in the area with the intention of launching an offensive to carve out a buffer zone inside Ukrainian territory.

## UK trade body calls for maintaining duties on Indian imports of PET plastics

PTI, LONDON: The UK's Trade Remedies Authority (TRA) has published its initial findings that a countervailing or anti-subsidy measure on the imports of polyethylene terephthalate (PET) from India be maintained for a further five years. The proposal, published in a 'Statement of Essential Facts' this week, follows a review initiated in July last year which concluded that subsidised imports of PET are likely to recur if the measure was no longer applied and that "injury to UK industry" would also be likely to recur. The TRA also found that maintaining the measure is in the economic interest of the UK, a statement notes. Countervailing or anti-subsidy measures are

the UK's one of three trade policy tools to counter imports which are "causing or threatening injury" to domestic industry, the other two being anti-dumping and safeguard measures. Countervailing or countervailing measures address imported goods which are being subsidised by foreign governments. The TRA found that while Indian imports of PET during the investigation period were low at just 24 tonnes in 2023, the subsidy programmes identified in an original European Union (EU) measure still exist and are likely to continue. "The intended recommendation is to maintain existing countervailing duty rates, ranging from 0 per cent to 13.8 per cent, until August 2029," it added.

**LORD I'M COMING HOME**
